| 총괄학교평가      |  |        |       | 학부모의 학교평가   | This school has very dedicated teachers who really care for the well being of the children. My two kids have gone there since Kindergarten, they are now in 8th and 6th grade and they both totally enjoy going to school there. They have good sports programs, my son's team even won their 5 class division championship this year in soccer. A lot of the parents are involved and motivated in the school activities and functions and we have met many great friends there. The new principal is very energetic and I believe will help to further develop the school to be excellent! Furthermore they are getting a very good education and are being taught christian values; teaching truth, respect, and consequences for our actions. The school does not shy away from these core values and it is an asset that is missing in many of the local |           |          |              |  |
